

S2000e

Office
Home

Monitors your PC's power consumption and power down your peripherals when not in use. Save money while you save the environment with the S2000e.

SWITCHES

The unit is able to house a 10A Thermal Overload Switch as well as other standard red and green switches depending on request.

ECO POWER OUTLET

The S2000e consist of a master power outlet and several slave power outlets. The master outlet controls power to the slave outlets by cutting off the power to the slave outlets when the computer goes into sleep mode.

SLAVE POWER OUTLETS

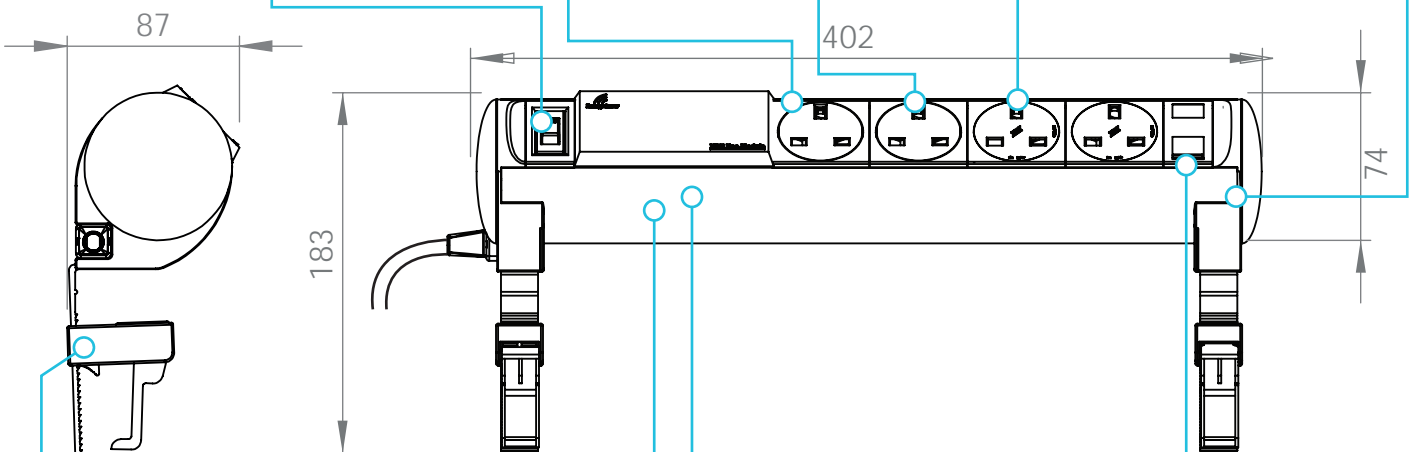

The master outlet resumes power to the slave outlets once the keyboard or mouse is activated. Slave outlets are used for supplying power to peripheral devices such as speakers, printers and monitors that do not need to be powered all the time.

POWER OUTLETS

Choose from 24 international power outlets available in black, grey and white. Optional colours are also available. Contact your closest distributor for more information or visit: www.powerlogic.net

AESTHETICS

Choose from a variety of colours and finishes for both metal and plastic components. Contact your distributor for more information.

MOUNTING OPTIONS

The unit is only available for desk mounting. It can be mounted on any desk surface ranging from 10mm to 50mm.

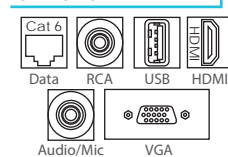

MINIMALIST DESIGN

Sleek aesthetics add a stylish touch to any professional environment.

SOFTWARE FREE

No software or links to your PC are required to activate the power-saving capabilities of the S2000e.

PERIPHERAL OPTIONS

All measurements are in millimeters unless otherwise indicated
